Mr. Johnston as Father Martin and Miss Grover as Barbel, rendered those characters in excellent style. Mr. Mortimer as Christophen made a good hit. Mr. Hatehinson as Reinhard, Mr. Tyler as Trofessor, and Mr. Turner as Worden, are also worthy of special notice. The whole cast of the play was, indeed, excellentages .......

This evening Mme. Scheller appears in a capital character as Romeo in Shakspeare's Romee and Juliet, a character in which she excels. This will be the last night of her present engagement, and we have no doubt the many friends and admirers she has made during her brief stay in this city, will strive to see that she has a "farewell" night worthy of the occasion and of her great merit as an artiste.

# Peter Martin's Hot Air Furnaces.

COLUMBUS, February 15th, 1865. To whom this may Concern.

Peter Martin, of Cincinnsti, has placed his Patent Improved Hot Air Furnaces in our High School and District School No. 5. The Furnaces in District No. 5 have been in use two years; those in the High School during this winter. So far they have given entire satisfaction. For efficiency in warming, quality of heat, economy of fuel, and promptness of action, they be properly appreciated. deserve special commendation. I cheerfully recommend Mr. Martin's Furnaces to any who may desire an excellent mode or E. D. KINGSLEY, Supt. of Public Schools of Columbus.

CIRCLEVILLE, Feb. 16th, 1865. The Warm Air Furnace nvented and manufactured by Mr. Peter Martin, of Chr. and I believe will produce a perfect cure cimnati, was put into the Union school building of this city in November last, and tively, a greater heating surface; produces in use. a larger volume of heat with a given amount of fuel; the condition of the air in respect o temperature, moisture and purity, is superior; the admission of cold air, the supply of warm air for the several rooms, and the fires, are more easily regulated.

air turnaces, and to secure to each room an abundant supply of pure, fresh air, warmed to a pleasant temperature, as well as to protect the wrought-from air-flues from the effects of the fire, it is essential that the warm air-flues leading to the school rooms, should be at least twelve inches in diameter. This will insure the influx of such a large and rapid current or resh air as to prevent the wrought-iron flues from being overheated; and thus secure the durability of the furnace, and keep the warm air in a healthful condition. It is deenfed proper to State in this connection, that our Board of Education was induced to order Mr. Martin's Furnace, because two other furnaces had been previously used in our school edifice without satisfactory re-sults, and because, after a careful examination of a large number of furnaces and other modes of warming school houses and other modes of warming sensor houses and other public edifices, not only in Western, b talso in Eastern cities, Mr. Martin's was lieved to be decidedly the best.

National Banks at Charleston-Condition of the Treasury. New YORK, Dec. 15.—The World's Washington special says: Two banks, with a capital of \$200,000 each, were chartered to-

It is announced that the Secretary of the Treasury has now good reason for being satisfied that the wants of the War Department will not amount to anything like what he was led to suppose they would. He is very confident he can get along during the present year without further loan and without increasing the public debt, and he is of opinion that next year he will certainly be able to diminish very much.
